PROFESSIONAL SUMMARY

Motivated and results-driven Full Stack Software Developer with hands-on experience building scalable and responsive web applications using React, Node.js, Express, and MySQL. Strong understanding of RESTful APIs, authentication systems, database design, and modern UI/UX principles. Passionate about writing clean, maintainable code and developing practical digital solutions that solve real-world problems.

TECHNICAL SKILLS

Frontend

- HTML5

- CSS3
- JavaScript (ES6+)
- React

Backend

- Node.js
- Express.js

Database

- MySQL

Tools & Technologies

- Git & GitHub
- VS Code
- REST APIs
- Authentication & Authorization
- Responsive Web Design

PROJECTS

Student Management System

- Developed a full-stack web application with secure login functionality.
- Designed separate Admin and Student dashboards.
- Implemented payment functionality and database integration.
- Built using React, Node.js, Express, and MySQL.

Final Year Project

- Developed an online platform with complete frontend and backend integration.
- Designed relational database schema.
- Built and tested RESTful APIs.
- Created responsive and user-friendly interfaces.

EDUCATION

Bachelor of Science in Computer Science

(Completed Final Year Project)

STRENGTHS

- Problem-solving skills
- Clean and structured coding practices
- Ability to work independently and in teams
- Fast learner and adaptable to new technologies

About Me

I am a passionate Full Stack Software Developer based in Addis Ababa, Ethiopia, with hands-on experience building modern, scalable, and user-focused web applications. I specialize in developing complete frontend and backend solutions using React, Node.js, Express, and MySQL.

I enjoy transforming ideas into real-world digital systems. From designing clean and responsive user interfaces to building secure authentication systems and RESTful APIs, I focus on writing structured, maintainable, and efficient code.

Through projects like a Student Management System and my Final Year Project, I have developed strong skills in:

- Full-stack web development
- Database design and integration

- Authentication and authorization systems
- Building admin and user dashboards
- Implementing real-world system functionality

I am continuously improving my skills, exploring new technologies, and aiming to build impactful software solutions that solve practical problems.
